

How it works...Class Dojo

Many families are already familiar with Class Dojo. Class Dojo is an important tool we will be using to share information with parents about learning programs during this time of change.

Teachers have provided parents with a code. Please contact your child's class teacher if you need another code or if you need help with set up.

How will we be using Class Dojo?

As a teacher...

Post announcements, updates and reminders

Post the days schedule

Let parents know when their child could access webinars, live streaming, cooperative learning opportunities with classmates, small group conferencing and individual conferencing with their teacher

As a student...

Upload learning to digital portfolios in senior years

As a parent...

Keep up to date with online learning, lessons, webinars, live streaming and schedules for students as we implement an online learning model.
