Third Party Provider Consent Form

Dear Families

Macquarie Primary School is committed to providing a technology rich environment for our students as our community believes the use of Information and Communication Technology (ICT) is fundamental in assisting teaching and learning in all areas of the school curriculum.

The use of web based learning resources and cloud based storage has risen steadily over the last decade and are increasingly being used by teachers across the Education Directorate to improve student learning outcomes.

As the following service provider requires some personal information, I am obliged under *the Information Privacy Act 2014* to advise you of the reasons for collecting the information, what will be done with it, the consequence of not collecting it and who else may have access to it.

Class Dojo

ClassDojo is a school communication platform that teachers, students, and families use every day to build communities by sharing what's being learned in the classroom through photos, videos, and messages. The site has been identified as being a useful component in the teaching programs at Macquarie Primary.

Class Creator

Class Creator is a web-based service that supports schools with the process of placing students into effective class groups. Macquarie will use this system to streamline the process and support staff in placing students into 2020 class groups.

Australian Council for Educational Research (ACER)

Students in years 1-6 will be participating in Progressive Achievement Tests in the area of maths. Progressive Achievement Tests in Mathematics provide information about the level of achievement of students. The tests assess students' skill and understanding in multiple-choice format in the six strands of:

- Number
- Algebra
- Geometry
- Measurement
- Statistics
- Probability

The assessments also address the mathematical processes of understanding, fluency, problem solving and reasoning. The skills assessed by each question are mapped against the Australian National Curriculum for Mathematics.

Language Perfect

Language Perfect is an online language learning program that assists students to learn vocabulary through structured lessons covering vocabulary acquisition, listening, reading and writing comprehension in French. Language Perfect can be customised to suit each class and can be accessed at anytime, anywhere. Applications are available for iOS and Android touch devices.

Splash Learn

'Splash Learn' is an adaptive and personalised math practise program for children. It is designed so that students can rehearse skills and develop confidence in a fun and engaging way. Teachers will assign tasks for students to do that are tailored to their current point of need. The interactive maths problems are set for students and explanations are provided for incorrect responses. Teachers can monitor student progress in real-time.

The Education Directorate has a privacy policy that explains how we handle personal information, including how we handle privacy complaints. The policy is available on the Education Directorate's website, www.education.act.gov.au, on the Publications and Policies page.

Please indicate your consent/non-consent for your child/children by ticking the appropriate option, signing this form and returning it to the school as soon as possible to record on your child/children's file.

Kind regards

Kristy Grant

Principal
